

Empowering People through Technology

Certificate No:351482020

Agenda

- Meeting your requirements
- YOURmeds overview
- Person Centred Care
- Data Driven Decision Making
- Next Steps

Medication Management

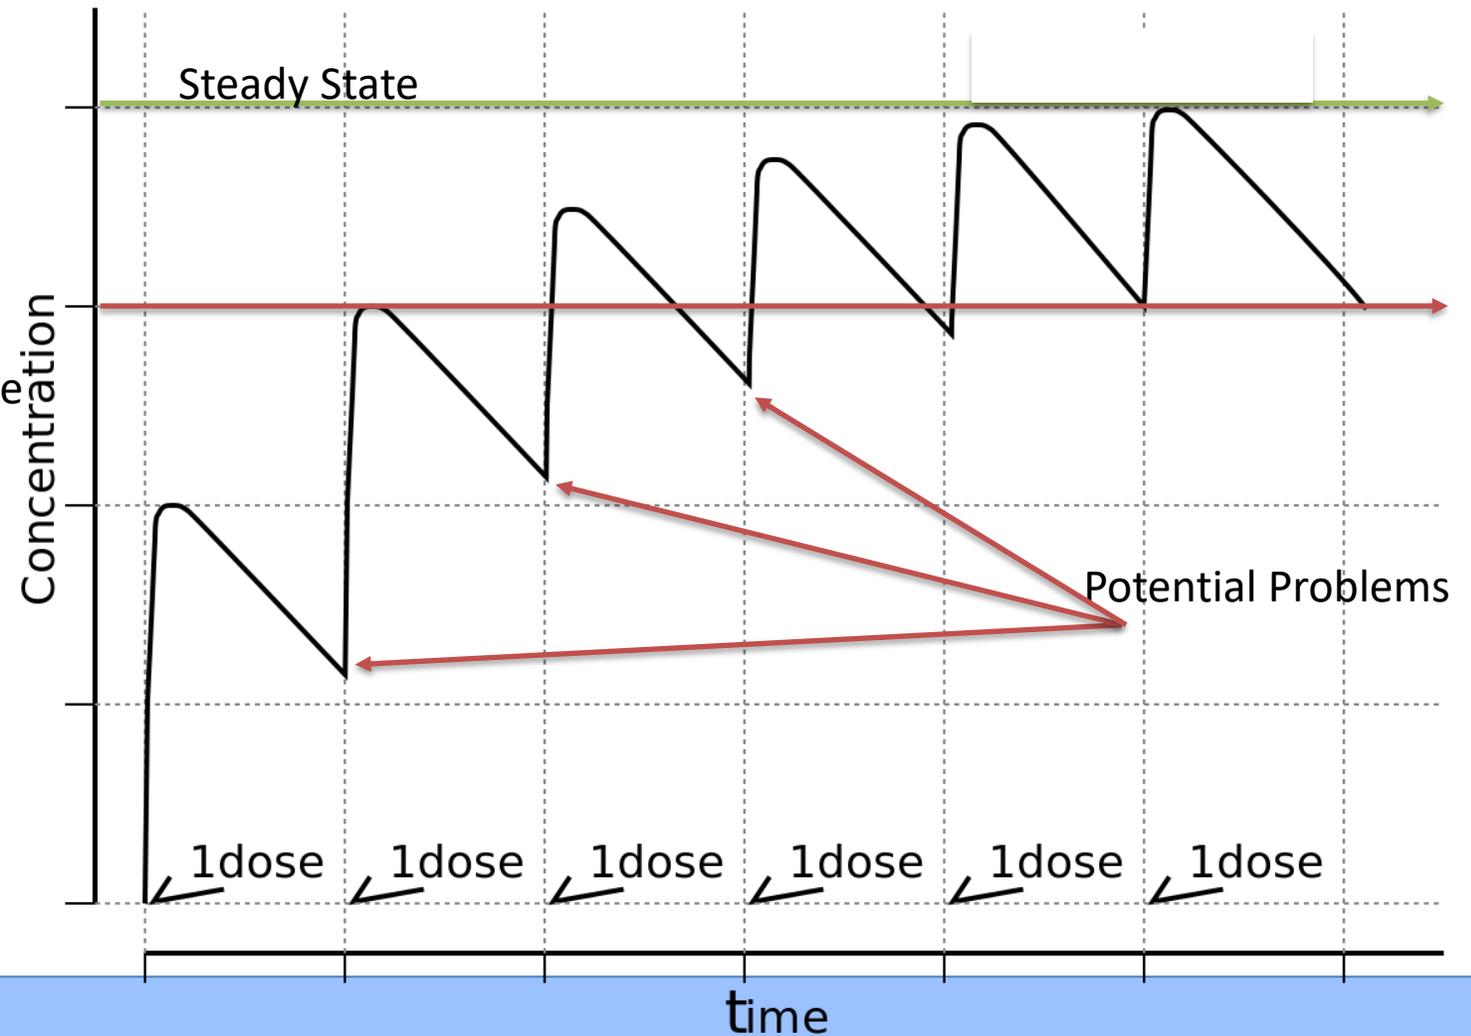

Who's problem is it?

Cost of 1 x 15 minute medication visit costs £8,400 –
South Tyneside Council

Why Every Dose Matters

- Drug concentration in the blood needs to be kept within a **therapeutic range**
 - Too high → Can cause adverse effects
 - Too low → Patient will not receive therapeutic benefit of drug
 - This can happen if the patient takes the drug at irregular intervals, or takes the incorrect dose
- YOURmeds Solution supports and monitors patients taking their medication in Real Time
 - Ensuring the patient receives the benefits of the drug without any adverse effects

Key areas where YOURmeds works

- Reablement
- Hospital Discharge
- Mental Health
- Supporting people to become more independent – Autism and Learning Difficulties

Adherence Data 2020 – May 2021

Adherence

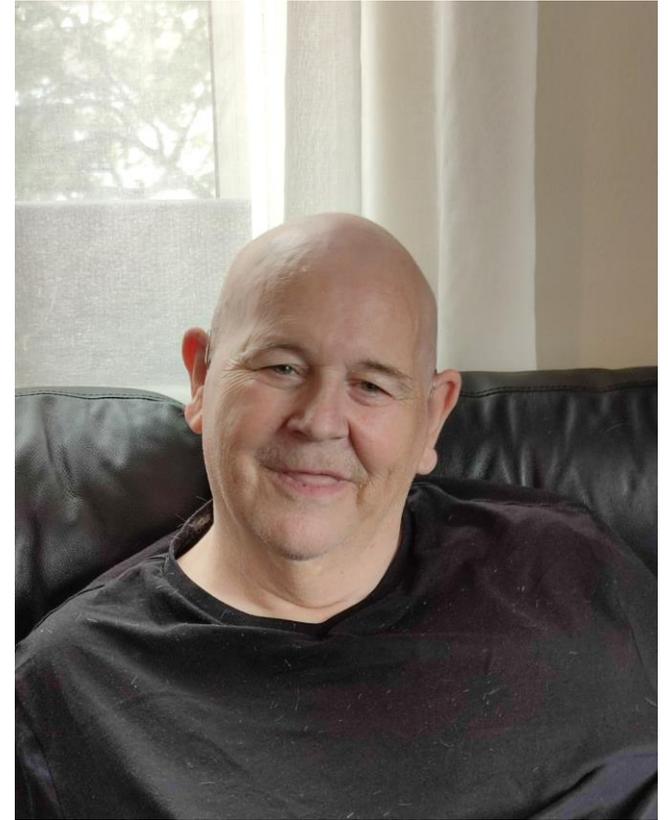

Parkinson's & Neuro Referrals

- Improve medication compliance and adherence
- Service users are on a standard blister pack
- Joint programme between Manchester City Council Assistive Technology Team and Manchester Local Care Organisation
- Working with Parkinson and Neurological Team Nurses to identify patients
- Patients are on average of 6 medication rounds a day
- YOURmeds works on a sequential basis using multiple tags

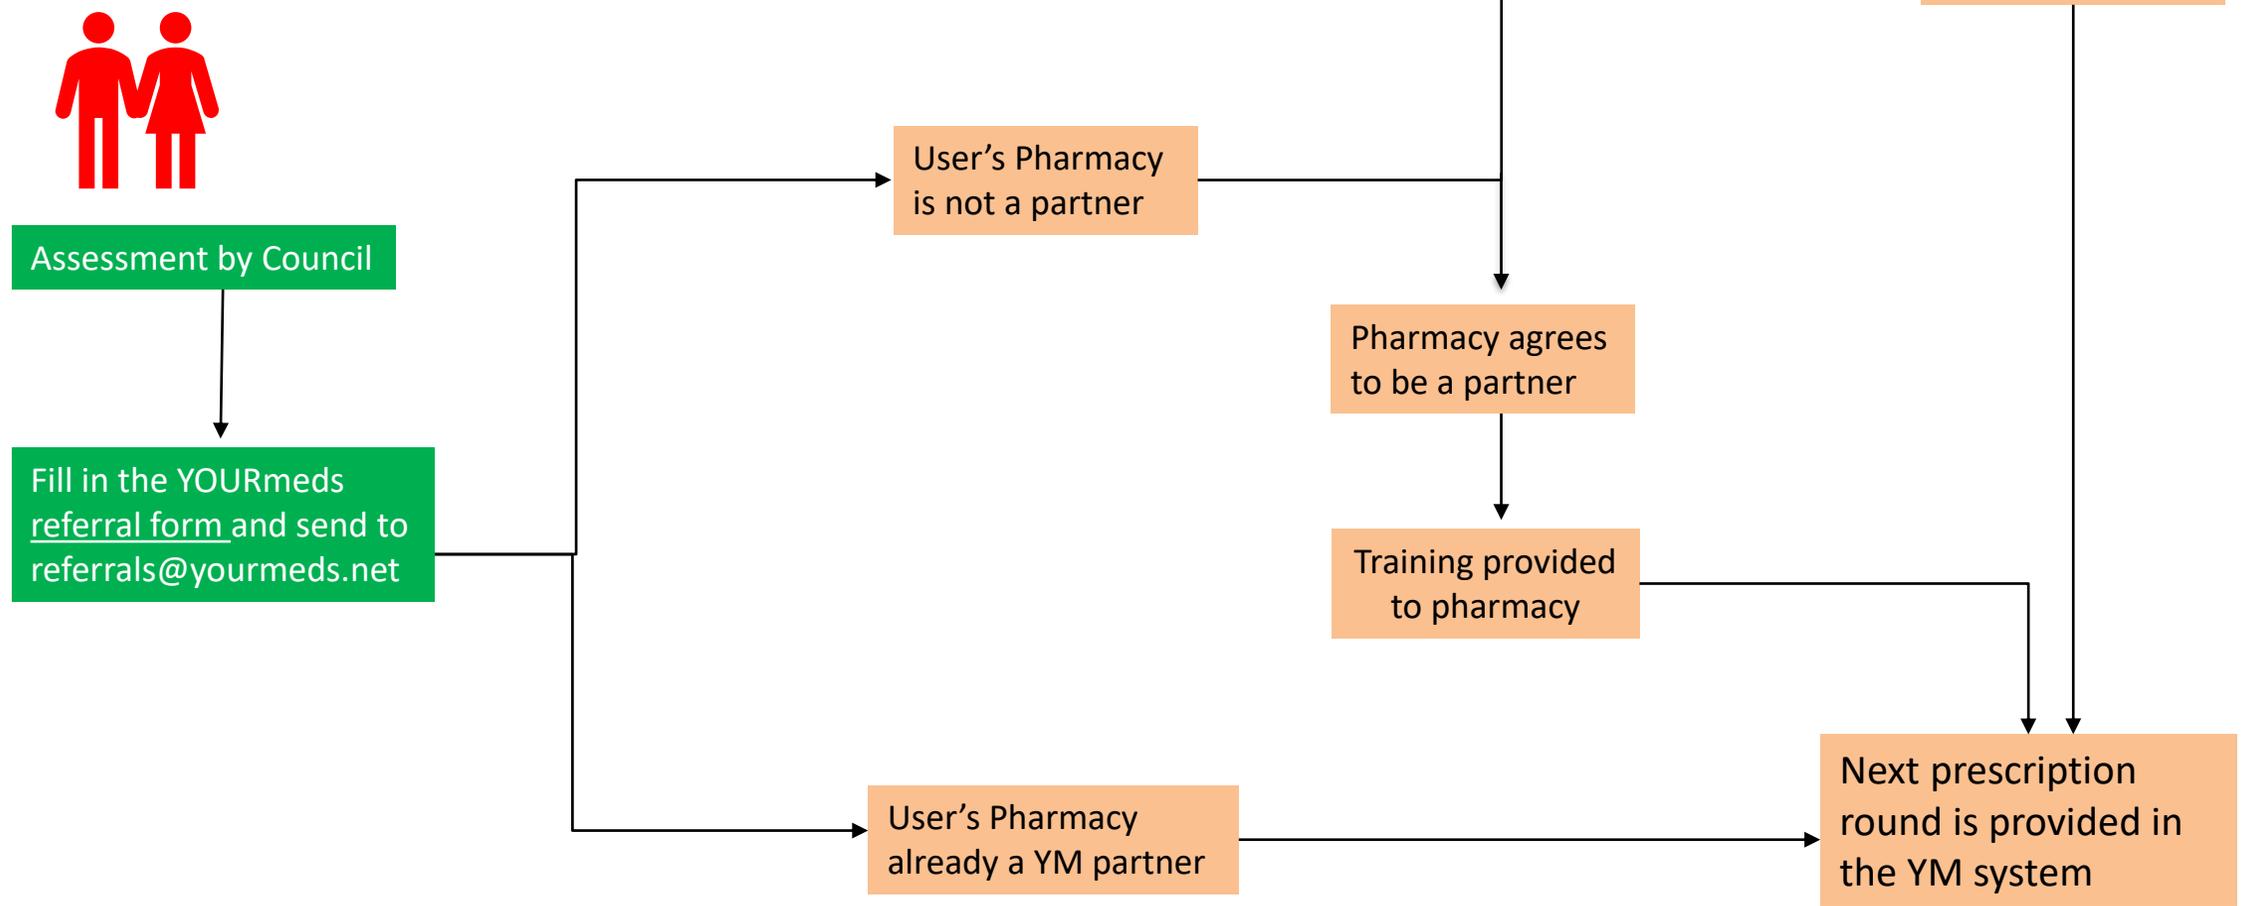

“I like the smart blister pack because it lets me know when to take my medication as my memory isn’t always the best.

It’s a good idea to remind me but also my friends who help support me. It lets me keep my independence more”

D Toner, Manchester
