# Oysta Technology

- Oysta are one of the UK's leading telecare solution providers
- We support large numbers of Vulnerable Independent People (VIP) in the UK & Spain
- COVID has highlighted the importance of telecare to social care provision
- Partnerships with LA's / HA's / Social Care providers / NHS Trusts
- Driven to provide innovative, person-centred solutions

# Working with our partners

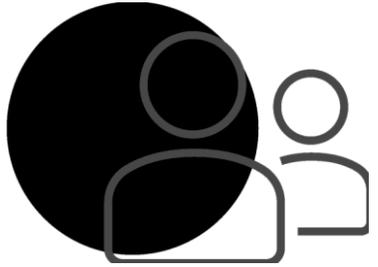

- Building processes that allow Oysta to deliver the service that is required
- Innovating solutions that empower better outcomes for the VIP
- Key safety sensors; SOS and falls with two-way communication  
Reminder prompts for medication, care-visits or appointments
- Encourages higher levels of physical activity and muscle recovery
- GPS and 'safety zones' mean patients have greater freedom but always protected.

# The way forward

- Integrated Care – the opportunity
- Reduce the care burden
- Remove barriers to use
- Collaboration with LA's / HA's / Social Care providers / NHS Trusts
- Driven to provide innovative, person-centred solutions
- Staffed - caring – UK team

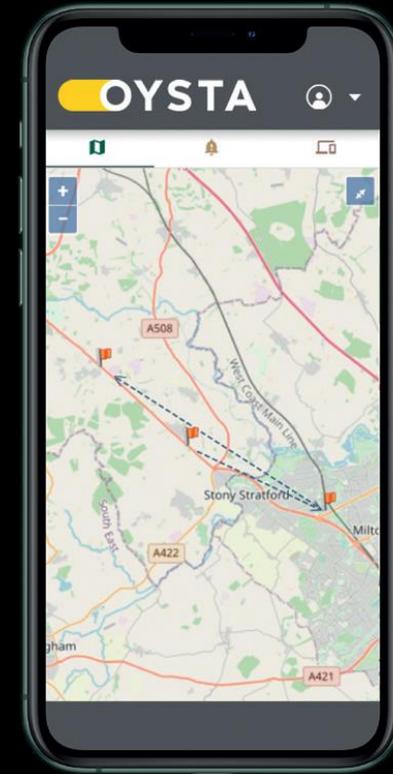

# Right care – Right Place

## Return on Investment in less than 2 days

Most hospital discharges occur within 48 hours of referral. However, in some circumstances this has taken several weeks to complete – apart from the financial costs, the impact on the patient is detrimental.

An accurate figure for the cost of a hospital bed is difficult to identify, but a conservative figure for the average cost per hospital bed per day is £400.

Assuming an average of 48 hours (2 days) to complete a referral from hospital to social care costs an additional £800 in bed costs. An Oysta device and a year's monitoring subscription costs about £320.
