- Device Management
- Smarter Alerts – fewer false alarms
- Trend analysis

Outcomes for all

For our Vulnerable Independent People (VIPs)

For Informal Carers

For the Local Authority

For formal care providers

For the NHS

Choice & Enabling

Enable to live their life

Reduced costs of care home placements

Reduce 1-2-1 Care

Hospital Avoidance

Hospital Discharge - Pilot Success

Aim:

- Improve the efficiency of hospital discharge for recovering Vulnerable Independent People (VIP)
- Reduce costs and increase capacity
- Better support VIPs in their recovery at home, in partnership with a care provider

The Project:

- Pearl+ given to VIPs in their own homes enabling them to request assistance when they needed it
- Data from Intellicare platform was used to help schedule visits
- Monitor the difference in care quality, service delivery, client satisfaction and budget spend with mobile technology

Outcome:

- Prioritise care without compromising service
- Increase capacity for care calls/clients
- Cost savings
 - TEC cost £109 per person per device & £3.40 per week
 - Average savings per person £160 per night
 - Based on cost of alternative overnight care
