Housing and Technology Specific Measures in the White Paper

- Invest at least £300 million over the next 3 years to embed the strategic commitment in all local places to **connect housing with health and care** and **drive the stock of new supported housing**.
- Invest at least £150 million of additional funding over the next three years to drive digitisation across the sector; and unlock the potential of caretech **innovation that enables preventative care and independent living**.
- Launch a £30 million **Innovative Models of Care Programme** to support local systems to build the culture and capability to embed into the mainstream innovative models of care. This will work for a changing population with more options for people that suit their needs and circumstances.
- Fund a new **service to make minor repairs and changes in peoples' homes**, to help people remain independent and safe. This will happen alongside **increasing the upper limit of the Disabled Facilities Grant (DFG)**.
- Continue to invest in the **Care and Support Specialised Housing (CASSH)** fund with £210 million available for the period 2022–23 to 2024–25.

West Midlands ADASS – getting ready

- Connected early with DHSC to support how Housing Transformation Fund is developed
- Commissioned Housing LIN to support with baselining, evidence gathering, partnership development and strategic planning
- Today's event – a key element of how we understand and prepare for getting the maximum benefit for the region for the Housing Transformation Fund
