

# RE-ENERGIZING HOUSING

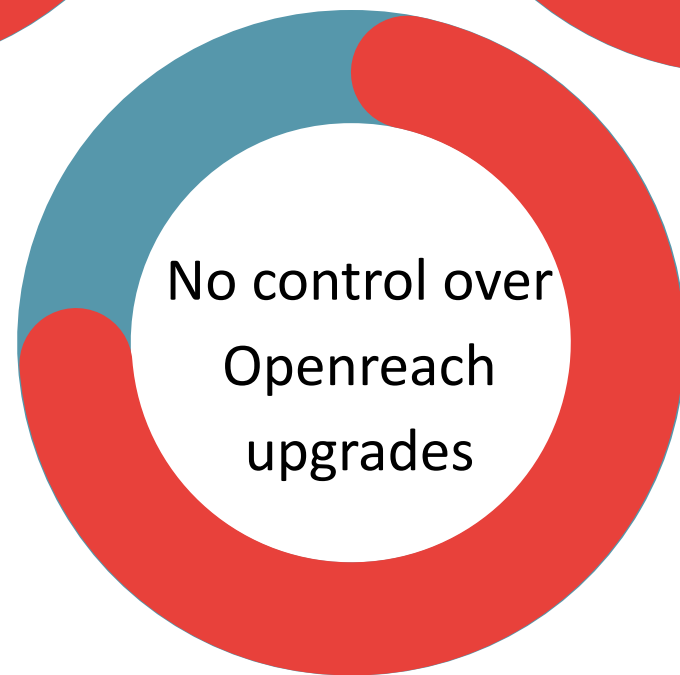

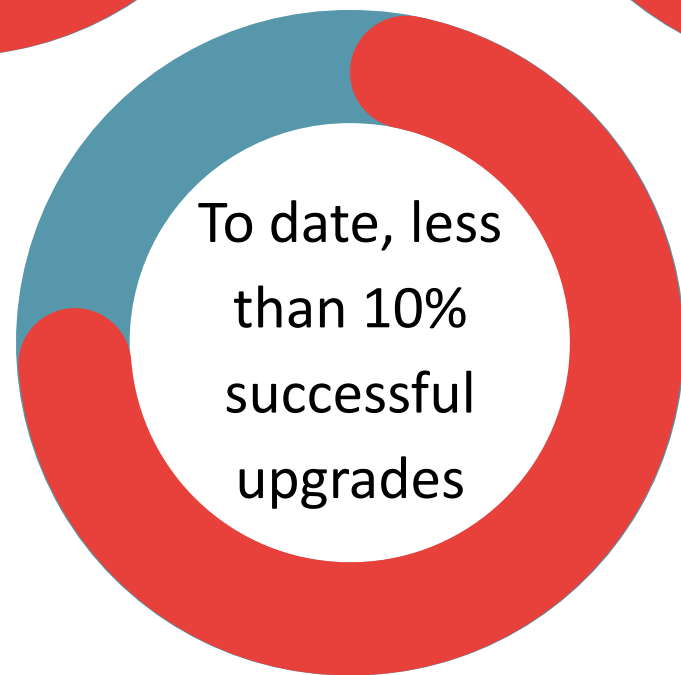

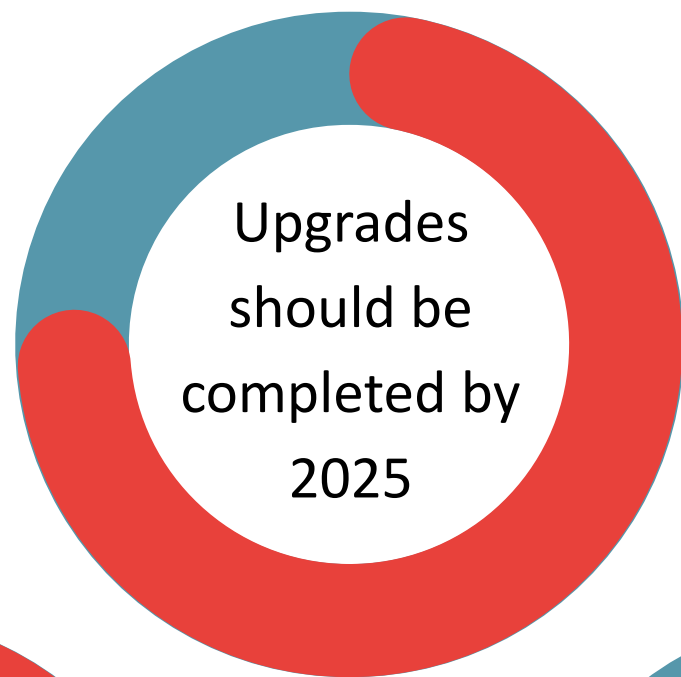

**Peter Kerly**  
**MD**

# TIME IS YOUR ENEMY

# THE URGENCY TO IMPLEMENT TOMORROW'S TECHNOLOGY TODAY

Increase in the senior population (+65), and the prevalence of complex long-term conditions

To counter the ageing population, assisted living suppliers must deliver solutions that allow the delivery of efficient pathways which support the delivery of high-quality care

To realise the full potential of IOT technology and deploy state-of-the-art IoT devices which support the delivery of integrated health, housing and social care solutions

Reactive to Proactive. The need for technology to identify risk ensuring an appropriate response prior to an alert is a key outcome.

# QUALITY

Quality is key and Everon UK has invested and developed a quality solution that supports this objective and the trust of our existing partners and potential customers.

- ISO 9001, ISO14001, ISO 13485, ISO 27001, ISO45001
- TSA QSF Certified
- Cyber Essentials Certified.
- CHAS – Health and Safety (awaiting confirmation)

Quality · Safety · Innovation

(awaiting confirmation)

# DIGITAL = OPPORTUNITY

## Future Proofing your investment

The digital upgrade brings enormous opportunity for all commissioners to establish a platform that delivers integrated health, housing, and social care services from within one data repository. This allows a building block model for designing and implementing a range of integrated services. Future-proofing investment by delivering a greater range of supporting services that meet the needs of an ever-changing client base.

# DIGITAL = OPPORTUNITY

We cannot operate a 'one size' fits all approach.

70% of bed space is occupied by individuals fit to be discharged.

Monitoring vital signs such as blood pressure blood oxygen temperature and weight allows the delivery of clinical interventions

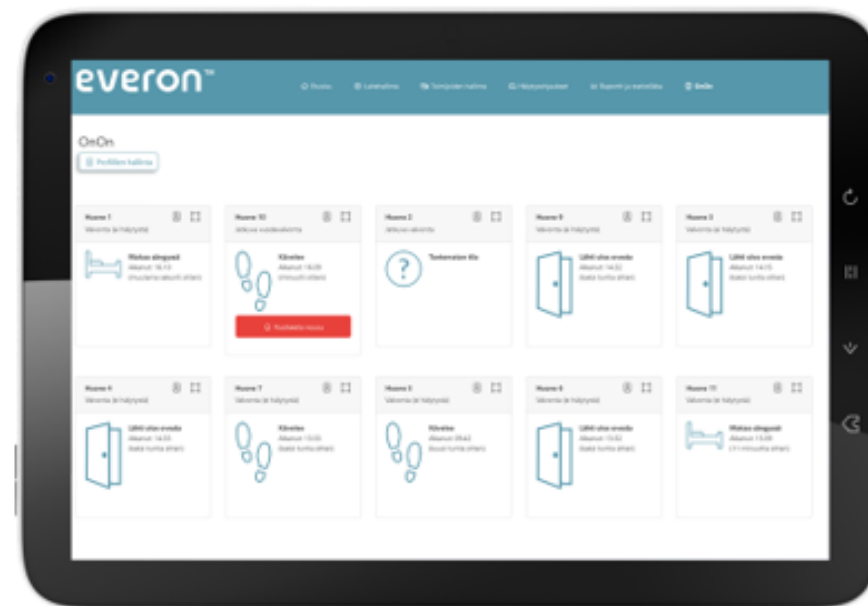

The Everon LYRA platform is designed to deliver a range of services that support the design delivery of bespoke services

Allows key stakeholders to deliver a more holistic model of care.

An integrated solution is vital for those stakeholders to work effectively

# REACTIVE TO PROACTIVE

**Our recently launched OnOn solution replaces the need for bed sensors, PIR's chair sensors and pendants**

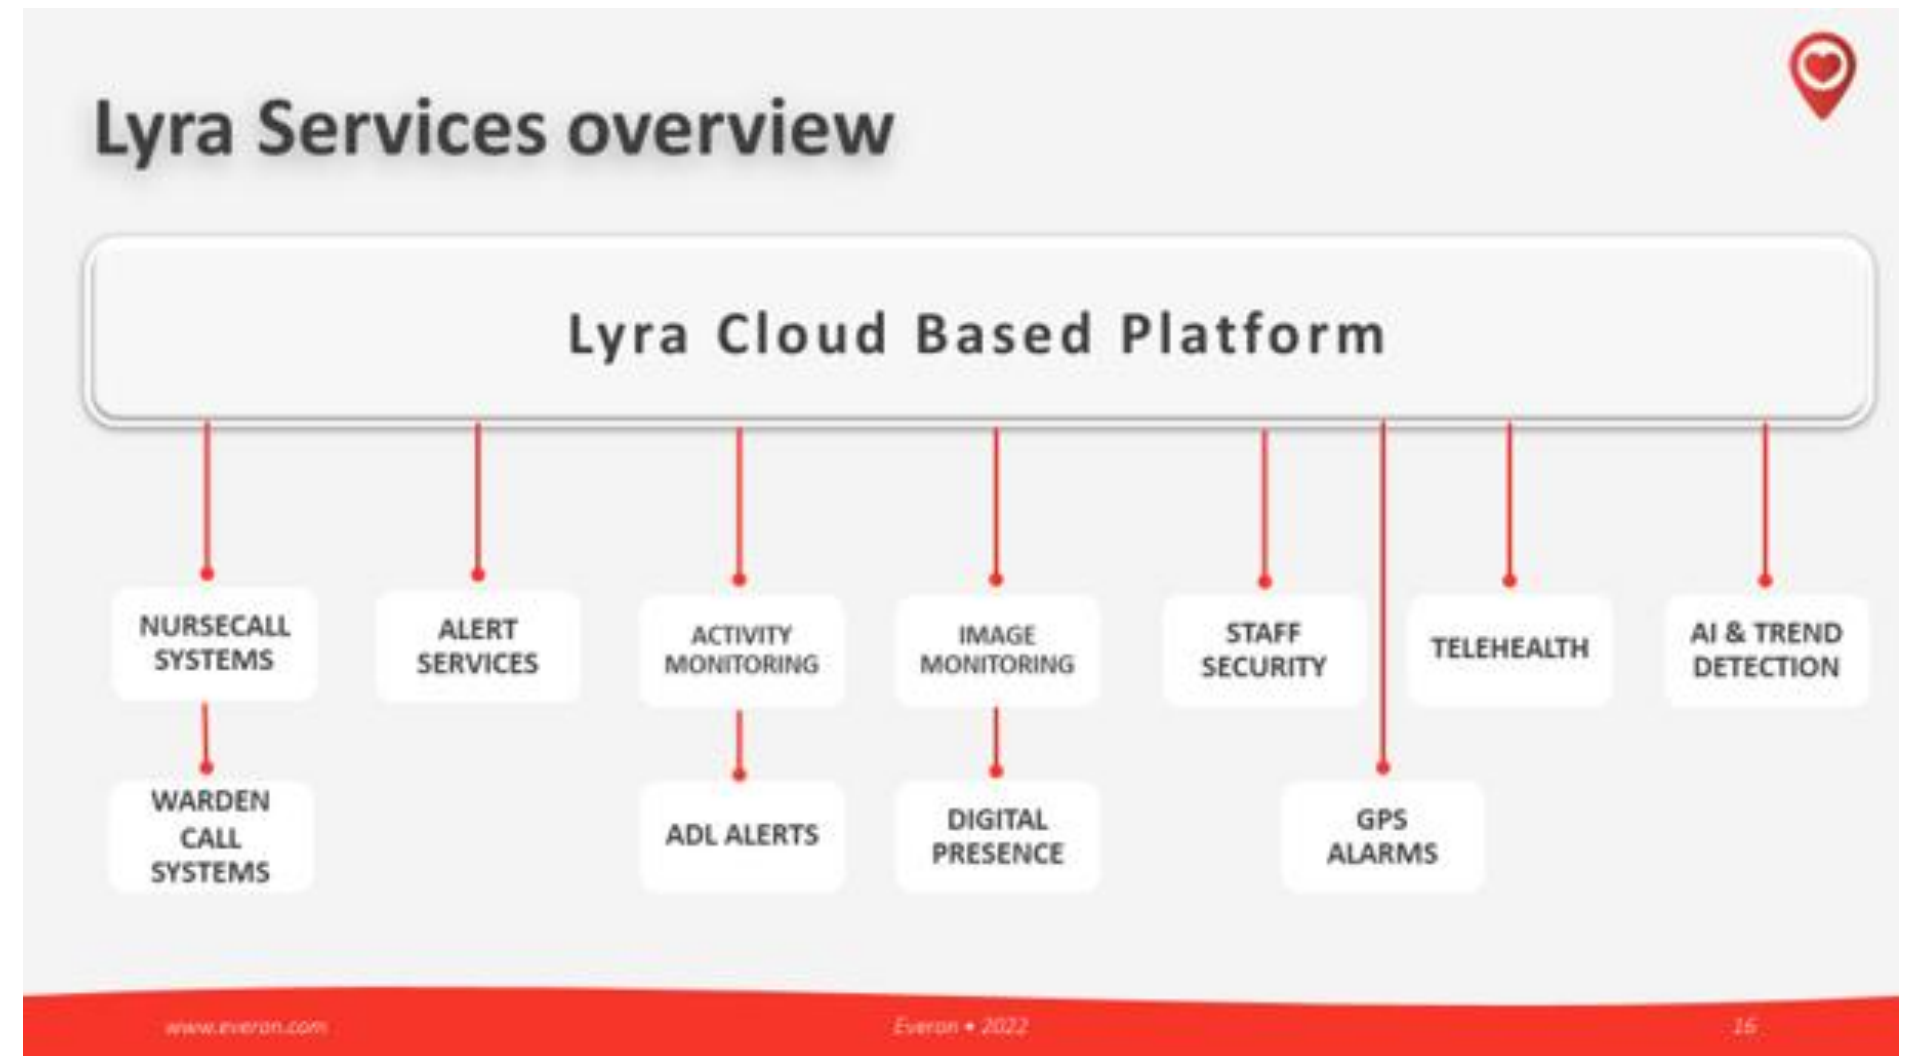

**Development of artificial intelligence is key to identifying potential declines in health and well-being and delivering a proactive model**

# SUMMARY

- Everon UK have designed and implemented an ecosystem of technological AI services that support the delivery of bespoke, solutions that meet the immediate needs of commissioners, replacing current analogue systems with a full end-to-end digital solution.
- Designed to become a building block to commission future services that will deliver Integrated Health and Housing stakeholders including Integrated Care Boards.
- All these services are designed to deliver measurable outcomes.

**THANK YOU**
