Access Assure: The AI-Powered Layer

Device-agnostic, AI-powered layer designed to sit alongside existing PERS devices and monitoring services.

The image shows a laptop displaying the 'Control Center View' of the Access Assure system. The interface includes a sidebar with navigation options like 'Home', 'Service Users', 'Organisation', 'Support Tools', and 'User Guides'. The main area is a table of service users with columns for ID, Name, ARC ID, Gateway, Alarm, Connection, Power, and Alerts. A callout box for 'Bathroom Duration' indicates a 'Significantly Higher' change. Another callout for 'Kettle Use' shows a 'Slightly Lower' change. To the right, a smartphone displays the 'Family App' interface, showing a list of service users with their status (Online/Offline) and battery levels. A callout for 'TV Duration' indicates a 'Moderately Higher' change.

ID	FIRST NAME	LAST NAME	ARC ID	GATEWAY	ALARM	CONNECTION	POWER	DAILY MONITORING
103	Noel	Herman	96812936	[Icon]	[Icon]	[Icon]	[Icon]	0 Alerts
