TEC-Specific Cyber Risks & Incident Management

Objective:

To identify and address specific cyber risks in the TEC sector and provide mitigation guidelines as an output.

Key deliverables:

Completed

- Conducted risk assessments on key TEC systems

Ongoing

- Develop guidance to mitigate cyber security incidents
- Templates for; including response, communications plan, defining roles and post-incident review reports

Planned

- Recommend QSF amendments, including security policy reviews and incident management
- Implement sector-specific cybersecurity measures
- Promote cybersecurity awareness and training across the sector
 - Propose Incident Management Training & Awareness Programs.
