

THE
TEC

EVOLUTION

Connecting communities
and enriching lives

Shaping Our Future

Alyson Scurfield
Chief Executive, TSA

Vision: People's everyday lives enriched, enhanced and enabled by TEC

Mission Centric Approach:

Mission 1:
Empowering 1 million people with innovative technologies to avoid hospital and residential care by 2030

Mission 2:
Revolutionising wellbeing for 10 million lives through innovative technology in the home by 2035

Bringing The Missions To Life

To bring those missions to life we have defined three mission projects that focus on growing the sector through supporting new models of care, through supporting the people that deliver and receive that care and the technology that can support it.

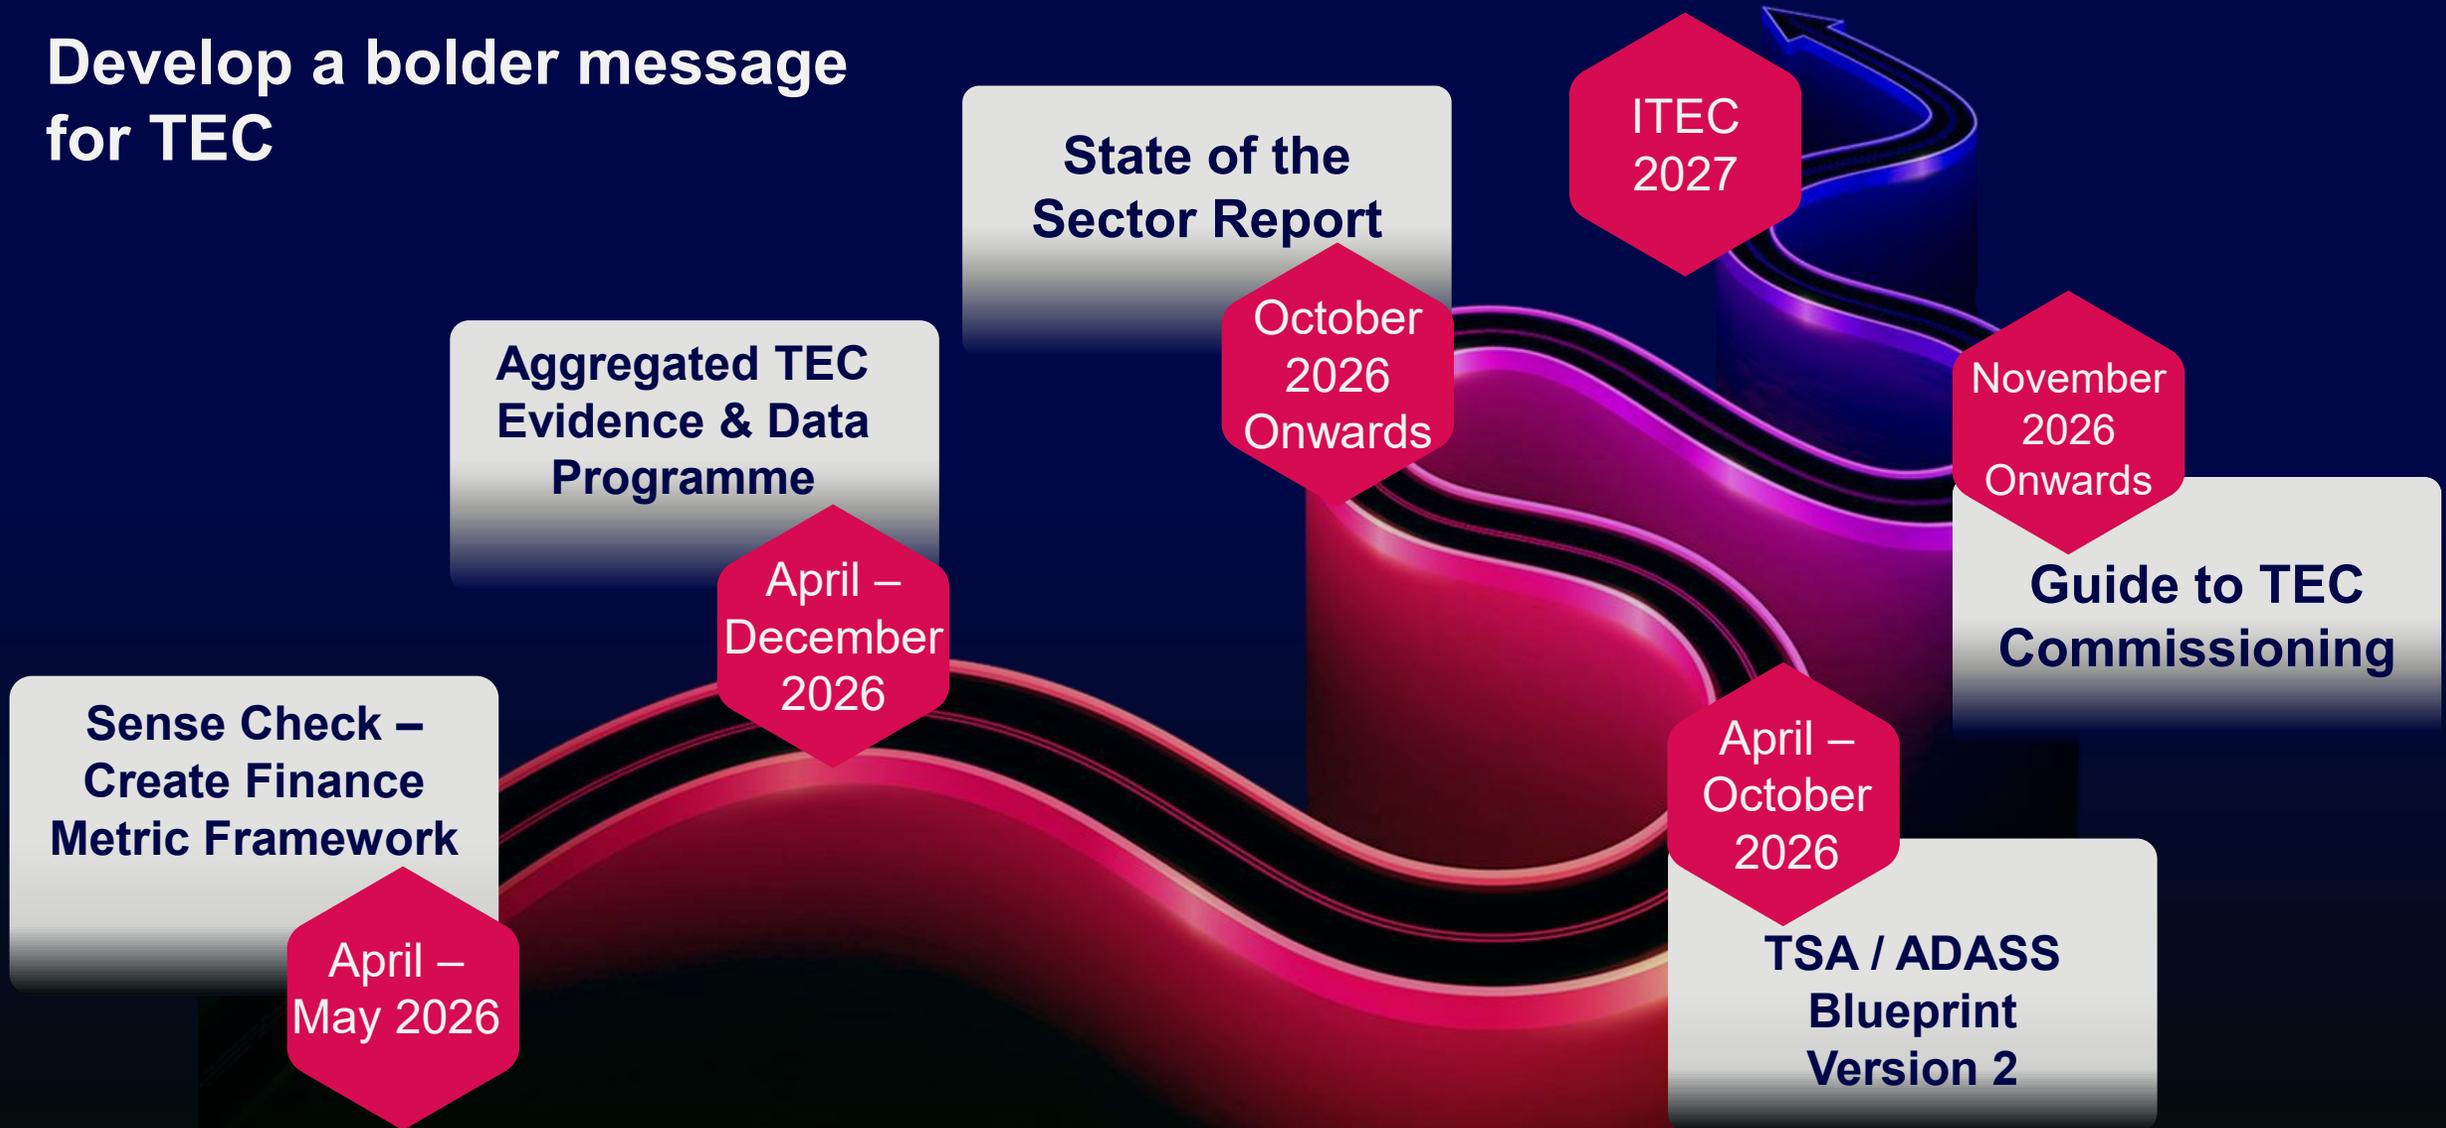

Mission projects:

1. Ensuring that future **Care Models** can be supported by TEC
2. Make Technology **Work for the People** who Draw on Care and Support
3. Lead the TEC sector's transition to safe, **interoperable, and intelligent technologies**
