# IP Cellular Network

The change from analogue to digital provides so much more in function, safety and choice and doesn't have to be a daunting task

We have come incredibly far in the UK in 2020 with many major providers delivering great IP TECS Services with Chiptech on multiple platforms

Chiptech products work with mobile IP connectivity

**20** Years
Manufacturing Telecare products

**5** Years
Manufacturing Digital Telecare products

# EVA

## KEY FEATURES:

EVA is a digital telecare system with voice guided installation. This step -by-step process talks the customer through the install and governs each step for safety.

With approx. 200k EVE/EVA devices in use today, EVA is a matured digital alarm unit with first class safety features and is provided with a huge array of peripherals.

EVA can be optionally monitored by family, friends or caregivers via the Response App, with alerts for help escalated to monitoring if required.

# GO

Chiptech GO is a digital personal help device with GPS location and fall sensing capabilities.

Whether you are at home, heading to the shops, walking through the park or going to visit friends, GO has your safety covered every step of the way.

GO encourages you to have more independence in your day to day activities, both at home and out and about. You can be confident knowing that help is at your fingertips.

> "
> I find it reassuring that my GO pendant works indoors and outdoors!. Love my GO pendant!
> "

> "
> Works beautifully. Really pleased with it and gives me confidence when out and about.
> "

# GO
