TAO

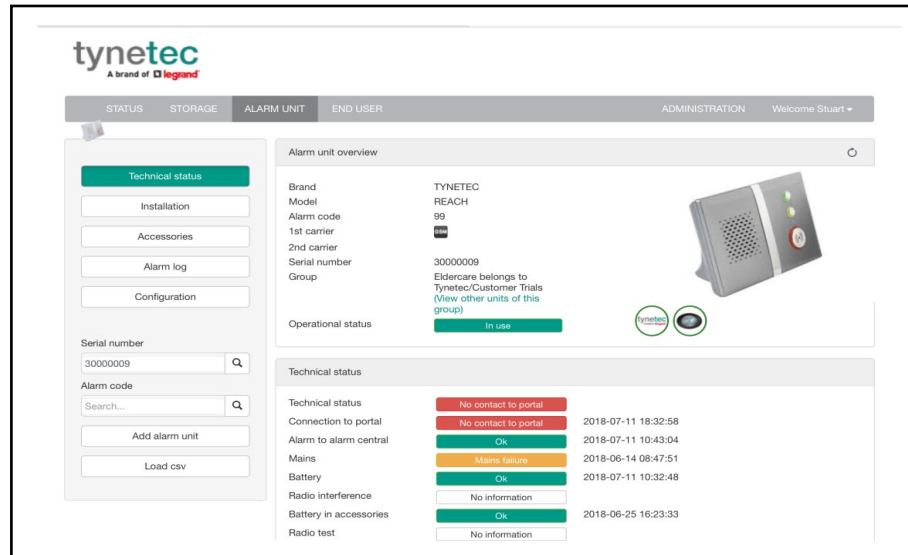

TECHNOLOGY ALWAYS ON

Customers Views -TAO Ecosystem During Covid-19

- Easy deployment
- Plug and Play
- Minimum contact
- Remotely configured and managed via the cloud.
- Supporting hospital discharge
- Immediate basic care package.

Thank goodness we have the new Tynetec IP units it has made life much easier for us especially when we can remotely program pendants and post them through people's doors keeping us at a safe distance and keeping clients safe at this challenging time. We have lots of Reach IP units ready to be installed so that when the hospitals are discharging to make way for the more needy of people, we are able to install a lot quicker, in some cases even arrange for family to collect the alarm and plug it in themselves for their loved ones .This is the great benefit of digitally enabled equipment!

The screenshot displays the Tynetec web interface for an alarm unit. The top navigation bar includes 'STATUS', 'STORAGE', 'ALARM UNIT', 'END USER', 'ADMINISTRATION', and 'Welcome Stuart'. The main content area is titled 'Alarm unit overview' and shows details for a TYNETEC REACH 99 unit. The unit is currently 'In use'. A technical status table is visible at the bottom of the page.

Technical status	Message	Timestamp
Connection to portal	No contact to portal	2018-07-11 18:32:58
Alarm to alarm central	Ok	2018-07-11 10:43:04
Mains	Mains failure	2018-06-14 08:47:51
Battery	Ok	2018-07-11 10:32:48
Radio interference	No information	
Battery in accessories	Ok	2018-06-25 16:23:33
Radio test	No information

North Tyneside Council**

Why Is Regulation Important As We Move To Digital TEC?

- Regulation is crucial and TEC providers should be aware of TS50134-9.
- New digital 'protocol' is a simple new rule that digital TEC needs to follow so speaking the same language as their monitoring centre.
- Developed to overcome the interoperability issues as TEC shifts from analogue to digital.
- The new TS50134-9 protocol will become industry standard TEC.
- Offering benefits such as flexibility, safety, reliability, security, future proofing, cost savings and interoperability

TS50134-9 Fully Compliant
