

Technology to keep
Vulnerable Independent People (VIPs)
Safe at home, Safe away from home

Betty

 OYSTA

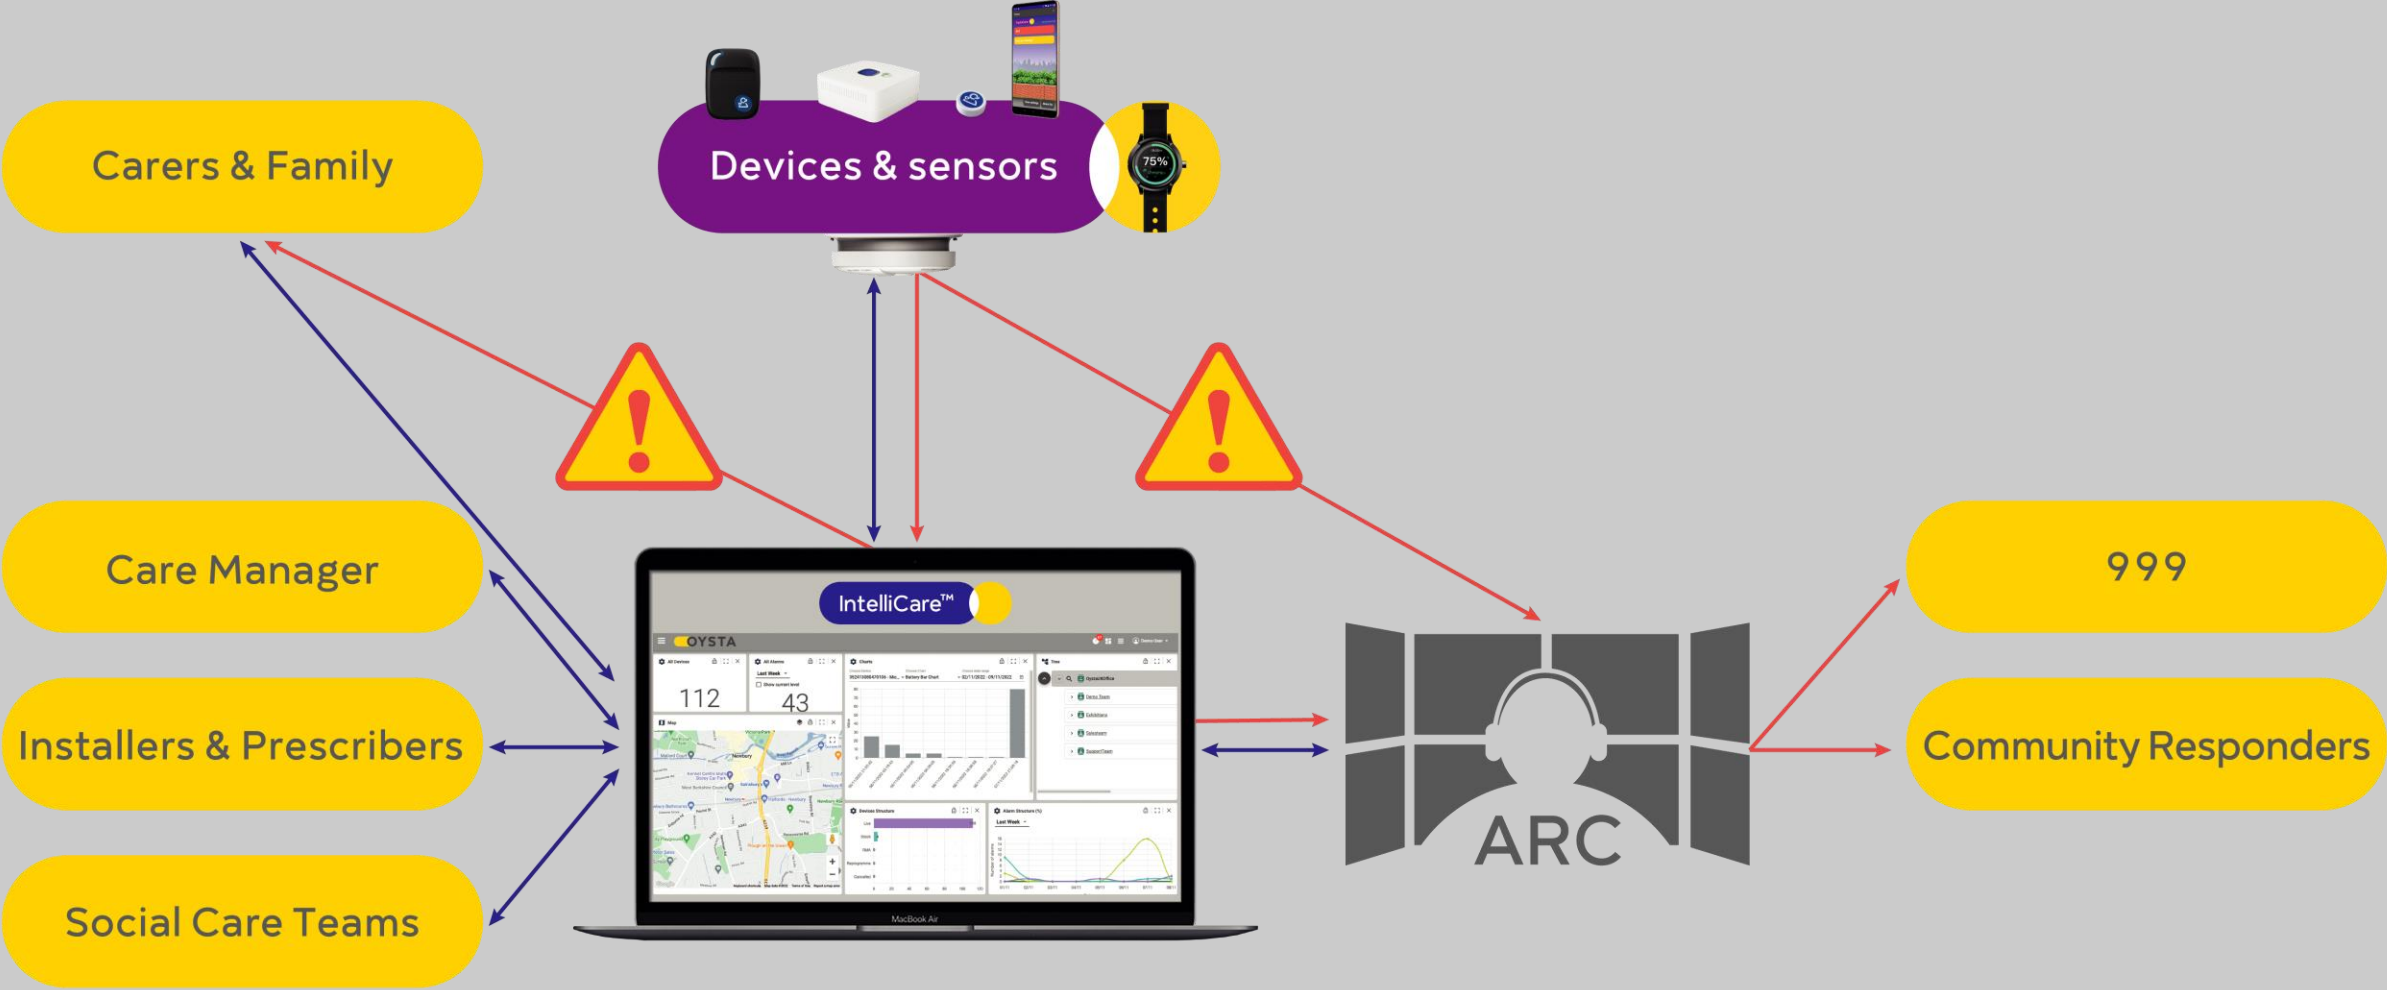

Bridge the gap between Health and Social Care

Connecting care, empowering independence with IntelliCare™

IntelliCare™ - The Data Receiving Platform

Care Managers

Care Managers to know where their devices are, which are being used, which need repairs

Carers

Carers know who's healthy and happy today and who's not, so they can prioritise

ARCs

ARCs want alarm calls, fast, and the data to make good decisions

Family

Family want reassurance and check in

VIPs

VIPs want support when they need it

Data Independence

With IntelliCare™'s **agnostic approach to care systems and devices**, social care teams can easily switch to different ARC or care software without losing VIPs data.

“Hugo is not prone to falling at this stage, but clearly as the disease develops that could change quite radically.

Right now, he can play golf with his friends or take a walk, and I don't have to worry because this technology gives me peace of mind.”

*“Hugo is active and goes out twice a day to walk the dog which helps keep him fit” – a key factor in helping to **prevent frailty and falls.***

*“When he goes out, I can carry on with my hobbies, with the added reassurance that, I can see which direction he has gone using **IntelliCare™.***

And if he is a little longer than normal, I can check to see if he’s on his way home, or if he’s lost.”

Hospital Discharge, Camden

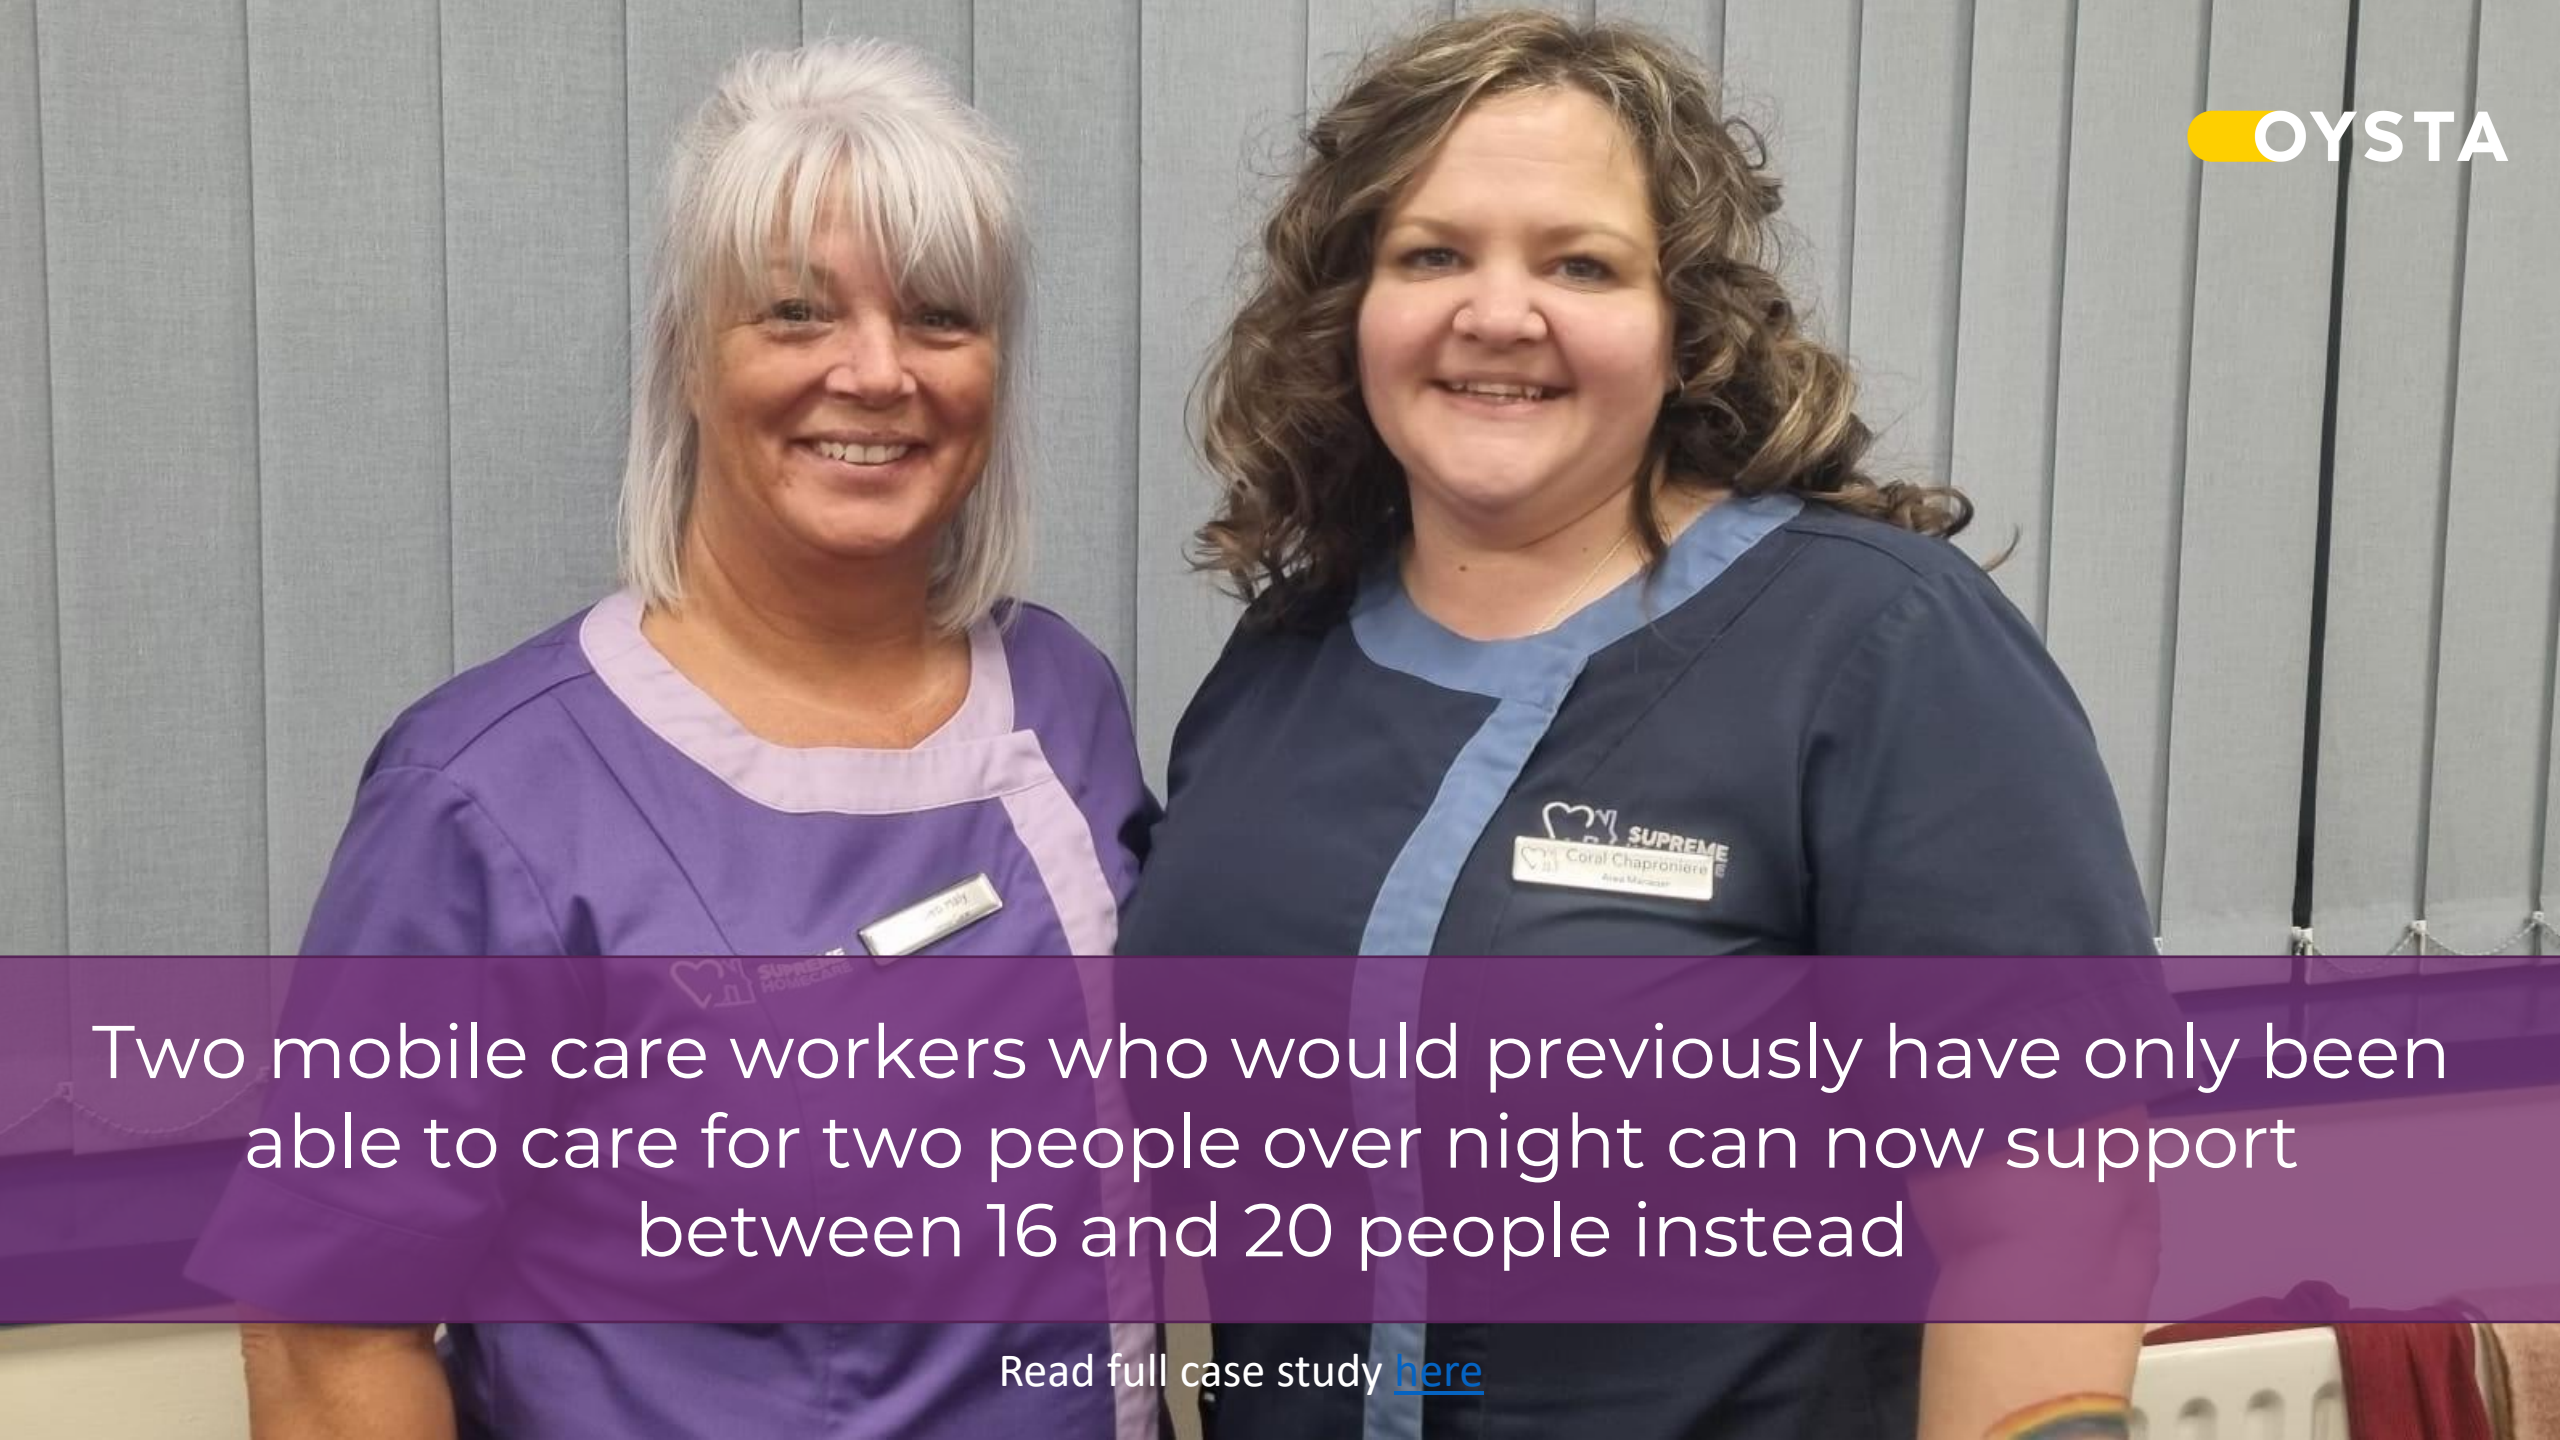

Without Oysta technology, patients would be in hospital beds awaiting social care assessments rather than hospital treatment.

Oysta tech enabled patients to leave hospital **3 days faster**, reducing pressures on the NHS, **saving the NHS an estimated 630 bed days.**

OYSTA

Two women, mobile care workers, are standing side-by-side in front of a grey wall. The woman on the left has short, straight white hair and is wearing purple scrubs with a name tag that reads "NO PREY". The woman on the right has long, wavy brown hair and is wearing dark blue scrubs with a name tag that reads "Coral Chaproniere Area Manager". Both women are smiling. A purple semi-transparent banner is overlaid across the bottom half of the image, containing white text.

Two mobile care workers who would previously have only been able to care for two people over night can now support between 16 and 20 people instead
